END OF YEAR EXAMINATION 2016**

SUBJECT : Mathematics

LEVEL : Sec 2 Express

PAPER : 1

DURATION : 1 hour 15 minutes

DATE : 12 Oct 2016

CLASS :	NAME :	REG NO :

READ THESE INSTRUCTIONS FIRST

Write your name, class and index number in the spaces on the top of this page.

Write in dark blue or black pen.

You may use a pencil for any diagrams or graphs.

Do not use staples, paper clips, highlighters, glue or correction fluid.

Answer **all** questions.

If working is needed for any question, it must be shown with the answer.

Omission of essential working will result in loss of marks.

You are expected to use a scientific calculator to evaluate explicit numerical expressions.

If the degree of accuracy is not specified in the question, and if the answer is not exact, give the answer to

three significant figures. Give answers in degrees to one decimal place.

For π , use either your calculator value or 3.142, unless the question requires the answer in terms of π .

The number of marks is given in brackets [] at the end of each question or part question.

The total number of marks for this paper is **50**.

Mathematics P1

- 12 The stem-and-leaf diagram below shows the scores obtained in a science test by a group of Secondary Two students from class 2A.

Stem	Leaf
1	5
6	5 7
7	6 6 8
8	3 3 5 5 5 7
9	4 4 8

Key: 6 | 5 means 65 marks.

- Find the median score of this group of students.
- Find the mean score of this group of students, giving your answer correct to 1 decimal place.
- Mr Sng claims that the mean score is a better guage of the performance of this group of students as compared to the median score. Do you agree with him? Explain your answer.
- It was later discovered that the score of 1 student was accidentally omitted from the data above, and the actual median score was x . Write down the largest possible value of x .
